U.S.SAWS™

U.S.SAWS Concrete Polishing Assembly

PN: SX60006CP

U.S.SAWS Metabo concrete polishing tools have the latest technology for fast work and tool longevity. The rugged polyurethane dust shroud is a key feature of the concrete polishing tool. It enables the polisher to be connected to a dust collection system for a more productive, comfortable work environment with less cleanup required. The dust shroud hose port is a standard 2" opening and features the "convertible" flip-up edge allowing the operator to polish directly against a vertical surface.

Metabo Grinder

2" Hose Port

Durable Shroud

Features:

- Hand-held units that are great for smaller jobs or in combination with walk-behind grinders on larger projects
- Ideal for polishing counter tops, in tight areas, or along walls where larger units can't get to
- May be connected to a variety of dust collection systems for dust containment
- The polyurethane dust shroud is long lasting and has an edge that can be flipped for edge work along vertical surfaces
- Systems include electric grinder, dust shroud, and backing pad

Smooth Loop Handle
