

U.S. SAWS

Spec Sheet: 24" Belly Saw & 24-72" Pipe Cutter

Coupled with our Tiger Tooth blades, our belly saws will cut through what ever pipe you come across at a job site. Its protective clamshell design protects you from the blade off the pipe and guides your cut when on the pipe. Air power provides durability, reliability, and freedom from pollutants if in a trench.

- Cuts pipe up to 24" in diameter
- Needs only 7" of clearance to cut the underside of a pipe
- Clamshell design shields blade until time to cut
- Rollers help ensure easy, straight cuts

When used in conjunction with our strap system*, cuts become low effort affairs

Our Big Pipe Cutter does exactly what its name implies.

Adjustable brackets facilitate cutting pipes from 24" to 48" in diameter in one setting, and then from 48" to 72" in the other.

Wheeled like our smaller belly saws, and using a similar strapping system, our Big Pipe Cutter offers the same simplicity, ease of use, and efficiency as the smaller Belly Saws

A special Strap is included with the Big Pipe Cutter
