

# U.S.SAWS™

## AIR POWERED BELLY SAW

The U.S.SAWS Air-Powered Belly Saw is engineered as a safer alternative to traditional cutting methods, which can be challenging and hazardous when working on pipes below grade. The tool straps securely to the pipe and is guided around it, ensuring a straight, efficient cut while enhancing both ease of use and operator safety. And because it's air-powered, the saw performs reliably even in wet conditions.

Requiring 90 CFM at 90 PSI, the Belly Saw cuts effortlessly through PVC, HDPE, ductile iron, cast iron, and more with its Tiger Tooth blade. A protective clamshell design keeps the operator shielded from the blade until the moment of the cut, and once contact is made, the four spring-loaded wheels paired with an upgraded strap assembly guides the saw around the pipe for a precise, straight finish.

Package Includes: 8"-24" Belly Saw with High-Output Motor, 8" Guard, 8" Tiger Tooth Blade, 24" Strap Assembly, 6' Whip Hose with Oiler, (2) Wrenches, (1) Quart Ice Free Oil & Storage Bag

### Features:

- Provides safe and efficient pipe cutting
- Designed to cut the underside of pipes safely with minimal clearance
- These saws will cut through any type of pipe when coupled with our Tiger Tooth blade
- Ideal for cutting pipe 8" to 24" in diameter
- Clamshell design shields blade until time of cut
- 4 spring-loaded wheels help operator to cut straight and square

AIR POWERED BELLY SAW	
Weight	30 lbs
Dimensions	8.5 × 21 × 10.5 in
Power Source	Direct Drive Air Motor
Air Requirements	90 cfm @ 90 psi
RPM	6,000
Max Pipe Diameter	24"
Blade Diameter	8"
Max Blade Width	.125"
Strap Assembly	8" to 24"
Part Number	US60278
