

U.S.SAWS™

BRASS BO BOP - VALVE BOX LIFTER

U.S.SAWS Brass (non-sparking) Bo Bop - Magnetic Valve Box Lifter is designed to lift small water valve covers or metal electrical box covers. We developed the Brass Bo Bop to help maintain the safety of the user in the gas and utility companies. The handle includes a brass plug to break stubborn valve covers free without creating a flammable spark. The Bo Bop allows the user to stop having to bend over to lift and remove covers.

Reduce finger and toe injuries with this lightweight deep reach magnetic valve box lifter. The magnetic field penetrates textured surfaces of lids and allows the operator to lift the casting out of the way ergonomically. This Magnetic Lifter is designed to give the user a safe and efficient way to remove covers quickly, safely, and easily.

Features:

- Magnetically lifts valve boxes or electrical covers
- 25 lb lifting capacity
- Solid handle for easy pick up
- Safe and efficiently remove covers
- Magnetic field penetrates texture surfaces allowing the operator to lift lid
- Reduces finger and toe injuries

Model	1 Magnet Non-sparking Bo Bop	1 Magnet Bo Bop
