

U.S.SAWS™

U.S.SAWS VSG-10 Stand-up Grinder

The VSG-10 is an easy to use, concrete floor grinding and polishing machine that will prep concrete surfaces in areas that cannot be accessed by larger equipment. The floor grinder and polishing tool is excellent for both large and small jobs sites. On larger projects, this machine works great as an edger or for accessing areas where your bigger equipment won't fit. A 2-3 car garage or basement can be prepped or polished quickly because of the VSG-10's high speed. The grinder has excellent coating removal capabilities when used with PCD segments. The grinding plate accepts 3 or 6 "Fast Change" diamonds are available in a variety of bonds and grits. With the velcro resin holders, any 3" resin, ceramic or hybrid tooling will work. Two people can easily lift this floor grinder up or down a flight of stairs and the 115V motor makes finding a power supply easy.
