

U.S.SAWS™

FSB-150H WALK BEHIND SAW

The U.S.SAWS FSB 150H Hydraulic Walk Behind Saw is perfect for concrete and asphalt cutting in areas where larger saws are impractical. With a cutting depth of 7.5 inches and powered by 12 GPM at 2500 PSI, this saw delivers powerful performance. Its heavy-duty frame reduces vibration for fast, precise cutting. The compact, exhaust-free design makes it easy to transport, making it ideal for interior applications, trench cutting, and restoration projects.

Features:

- Cuts to 7.5 inches deep
- 1/2" flush face quick connect hydraulic fittings
- No belt to slip
- Weight precisely balanced eliminating rocking of saw
- Lightweight and reliable
- Fume free so can be used safely in confined spaces
- Able to operate in water
- Use with blades up to 20 inches in diameter
