

U.S.SAWS™

U.S.SAWS Traditional and Hand-held Core Drill

US28605

US28610

The NEW hand-held and traditional core drills are a fast, accurate and efficient way to drill holes in concrete and other materials. The hand-held core drill allows the user to quickly drill 1" to 4" holes. The traditional core drill cores holes up to 12" in diameter. The drills are ideal for coring a range of materials including concrete, brick, and stone.

Features:

- Lightweight and portable
- Mechanical clutch protection
- Constant power, stepless speed regulation
- Safety clutch and overload protection
- Drill holes 1" to 4" with the hand-held unit and up to 12" with the traditional unit
