

U.S.SAWS Cyclone Pre Separator

The Cyclone Pre-Separator is a low-cost way to turn your industrial shop-vac into an effective industrial dust collector. It separates 99% of the concrete dust before it reaches the shop-vac.

The separator is compatible with 5" or 7" Hand-Held Grinder

Meets OSHA Table 1: Section 11 & 12 (XI) Handheld grinders for mortar removal (i.e., tuckpointing). (XII) Handheld grinders for uses other than mortar removal.

Features

- Low cost way to turn your Shop-Vac® into an effective, industrial dust collector
- Removes most of the concrete dust that passes from your grinder or saw's dust shroud before it reaches your vacuum's filter (filter must be 99% efficient to be OSHA compliant)
- Attaches to any shop-type dust collection system & extends its motor's life
- Reduces downtime changing filters
- For use with 1 hand-held grinder - 5" or 7" based on CFM of vacuum unit
- Debris falls into pail (any 5-gallon bucket works) for quick & easy disposal
- Unit includes separator, 8' hose, and roller base
- 2 models offered—with or without bags
- Model with bags includes adapter enabling use of plastic bags for easier emptying and less downtime
