

## M-22 3 Bag Mixing Station

The M-22 3 Bag Mixing Station is a compact, robust mixing station with good balance when pouring the self levelling compound, even with larger mixing volumes. The mixer unit is built with a 2-speed gearbox and variable speed setting allowing for quality control and mixing power. The M-22 is compactible with cement self-levelling and materials with good liquidity.

The unit comes complete with H27 mixer, 22 gallon bucket and transport dolly.

### Features:

- Provides good balance when pouring out the levelling compound even with large mixing volume
- Large opening to feed water and material
- Mixing volume up to 3 bags of levelling compound
- Powerful 1,800 watt mixer with 2 speed variable speed controller
- 2" hose port for vacuum hook up for dust control
- Ergonomic trolley allows comfortable material distribution
- Height adjustable guide handle included
