

M-22 4 BAG MIXING STATION

The M-22 4 Bag Mixing Station is a compact, robust mixing station with good balance when pouring the self levelling compound, even with larger mixing volumes. The mixer unit is built with a 2-speed gearbox and infinitely variable speed setting allowing for quality control and mixing power. The M-22 is compatible with cement self-levelling and materials with good liquidity.

The unit comes complete with special stirrer H27 and mixing bucket 85 L.

Features:

- Provides good balance when pouring out the levelling compound even with large mixing volume
- Large opening to feed water and screed powder
- Mixing volume up to 4 bags of levelling compound
- Powerful 1.900 watt mixer with dual gear variable speed controller
- 2" hose port for vacuum hook up for dust control
- Ergonomic trolley allows comfortable screed distribution
- Height adjustable guide handle included
