

MC-60 CONCRETE MILLING MACHINE

The MC-60 is a portable electric milling machine specifically designed for removing spalled concrete joints and other surface repair applications.. Powered by a 15-amp Metabo W26-230 grinder, it delivers efficient material removal—cutting up to 1" wide with 5 blades or 1.5" wide with 8 blades to a depth of 1" at speeds up to 2 feet per minute—all while allowing the operator to work comfortably from a standing position.

Built with a heavy-duty steel frame, the MC-60 features a unique wheel configuration that rolls smoothly over existing cuts and joints without destabilizing. A forward-mounted handle provides precise control and ensures consistent forward pressure on the blades for clean, accurate milling.

Features:

- Powered by a 15 amp Metabo W26-230 grinder
- Cuts up to 1.5" wide by 1" deep in a single pass
- Milling speed is up to 2 feet per minute
- Excellent dust collection compatibility for cleaner operation
- Heavy-duty steel frame built for job-site durability
- Forward handle design for improved control and blade pressure
- Capable of milling up to 8" wide with multiple passes without compromising stability

2" HOSE PORT

MULTIPLE BLADE STACK

ADJUSTABLE HANDLE

POWERED BY METABO

MC-60 SPECIFICATIONS

Part Number	SX45100
Grinder	Metabo 26-230
Output Power	15 AMP
Power Requirements	115V, 60Hz
Max RPM	6,600
Max Cutting Depth	1"
Blade Size	6"
Max Width	Single Blades: .090" Multiple Blades: 1.5"
Arbor Size	7/8"
Dust Collector Size	200 CFM+
Weight	47 lb
