

MC-1000 PROPANE JOINT SAW

The MC-1000 is a Certified Propane Powered, self propelled, Joint Clean-out Saw/Mill designed to clean-out existing control joints to prepare for new joint fill applications or remove failing or deteriorated existing joint fill material. This machine can be used to remove polyurea, epoxy, and polyurethane joint fill materials. This machine is designed for large joint clean-out projects where a certified propane power source is preferred over gas or electric.

The 23 HP Briggs and Stratton Vanguard V-Twin, a certified propane engine, powers the saw. It features an electric start, and the twin-cylinder design has reduced vibration and high torque.

Features:

- Can hold up to 16 blades for a cutting width of 4"
- Equipped with a CO monitor
- Up cut blade rotation removes debris and material from the joint and ejects it up towards the vacuum port
- Versatile blade configurations provide solutions for joint clean-out and spalled joint restoration
- Redesigned belt drive system for easier maintenance and longer wear life
- Front and rear pointer guides for accuracy
