

# U.S.SAWS™

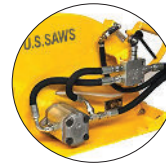

## HYDRAULIC HAND-HELD SAW

The U.S.SAWS Hydraulic Hand Saw is designed for durability and ease of use, featuring a fully welded aluminum frame and a large, dual-position front handle for superior control during operation. This versatile saw is available in three blade sizes: 16", 21", or 24", allowing users to choose the best option for their specific needs. Powered by a highly efficient hydraulic motor, the saw delivers exceptional blade speed and torque, ensuring optimal cutting performance. Each model comes standard with a 6-foot hose whip, equipped with flush face quick disconnects for added convenience and ease of use.

### Features:

- Sturdy all welded aluminium powder coated frame
- Heavy Duty large dual position front handle for easy control
- Water shut-off valve and manifold block positioned to avoid any chance of damage
- Highly efficient hydraulic motor choice for both strong blade speed and torque delivery
- Hydraulic handsaw motors used vary based on power pack engine & pump sizes
- The most reliable, simple to use, and easy to refurbish hydraulic handsaw
