

MERIT POWER PACK - M300-23G-HPP

The M300 Merit hydraulic power pack is built for the professional cutter that runs all day and demands a reliable, cool running hydraulic power source. The 23-hp Kohler engine delivers power to the hydraulic pump with a variable flow control.

End users have the ability to dial in 1-14.5-gpm (pre-set to 12 from the factory). The dual hydraulic oil coolers keep oil temps under control under the most demanding environments. Another top feature is the compact design fits through 30" wide doorways and maneuvers around job-sites easily.

Features:

- Compact design delivers almost 15 gpm with the footprint of most 10 gpm units
- Low mounted oil and fuel tanks keep center of gravity low and aid in maneuverability
- Hydraulic and water fittings mounted inside frame rails for protection
- Dual hydraulic oil coolers keep temps down under the most demanding work environments
- Self draining tube-in-shell cooler safeguards against damage in cold climates
- Variable flow valve allows users to adjust flow output from 1-14.5 gpm
- Manifold mounted pressure gauge allows operator to monitor tool load
- Lifting point allows for easy loading and transport
- Spin on hydraulic oil filter makes oil changes convenient

HYDRAULIC POWER PACK

Oil Flow	1 - 14.5 GPM variable flow control valve
Pressure	2000 psi (max)
Oil Reservoir	8 gallons / 30 L
Fuel Capacity	4 gallon / 15L
Engine Manufacturer	Kohler
Measurements	29" x 21" x 36"
Weight	450
Cooling System	Air to oil and water to oil cooling systems
Part Number	MT30023GHPP

**WATER WORKS
DIVISION**
