

7" SCORPION 2600 HAND-HELD GRINDER

The 7" Scorpion hand-held concrete surface grinder is designed to prep concrete for coatings while capturing dust when connected to a vacuum. This grinder is a must-have for any industrial flooring contractor applying floor coatings, removing old coatings or carpet glue, or grinding down high spots.

Hand-held units like the Scorpion are ideal for smaller jobs and work perfectly alongside walk-behind grinders on larger projects. The 7" Scorpion excels at grinding edges, tight areas, underneath fixtures, and other spots where large floor grinders or shot blasters simply can't reach.

The Scorpion 2600 comes equipped with a Scorpion Grinder, U.S.SAWS Convertible Dust Shroud, Comfort Grip Loop Handle and Nuts.

Features:

- Hand-held units that are great for smaller jobs or in combination with walk-behind grinders on larger projects
- Use on concrete for cleaning, leveling high spots or uneven floor surfaces, removing glues, mastic, epoxies and other coatings
- May be connected to a variety of dust collection systems for dust containment
- The unit's polyurethane dust shroud is long lasting and is offered in full shrouds and convertible models that flip up to allow for edge work along walls
- System include an electric grinder, dust shroud and hardware for mounting diamond cup wheels or ZEC wheels

7" SCORPION GRINDER SPECIFICATIONS

Part Number	SX60620
Grinder Make and Model	Scorpion 2600 Grinder
Power Source	Electric
AMP	15
RPM	6500
Power Requirements	120V, 60Hz
Minimum CFM	175
Production Capacity	150-200 sq ft/hr
Wheel Diameter	7"
Weight	20 lb
